HYDE PARK, VERMONT

DEAR SIRS:

A REVIEW OF THE X-RAYS OF MR. CHESTER MOODY SHOWS A FILM TAKEN JULY 6TH, 1946, WITH NEGATIVE FINDINGS IN BOTH LUNG FIELDS. A REPEAT FILM DONE JULY 6TH, 1948, SHOWS ENLARGEMENT OF THE HEART SHADOW, WITH INCREASED DENSITY IN BOTH LUNG FIELDS. THE FILM TAKEN JULY 28TH, 1950 SHOWS THE SAME CONDITION OF THE LUNGS, BUT LESS MARKED; I.E. INCREASED DENSITY IN BOTH LUNGS.

THIS MAN GIVES A HISTORY OF BEING UNDER TREATMENT FOR HIGH BLOOD PRESSURE AND NERVOUSNESS, WITH SOME WHEEZING THROUGHOUT HIS CHEST. THE INCREASED DENSITY, WITH THE APPARENT ENLARGEMENT OF THE HEART SHADOW COULD BE DUE TO DEPOSITS OF DUST. HOWEVER, THERE HAS BEEN LITTLE CHANGE IN THE LAST TWO YEARS.

YOURS TRULY,
E. B. French M.D.
