DOCUMENT DESCRIPTION: Letter from OWILL to Saranac Laboratory RE
Kaylo Division & Research & Finances with Many Handwritten Notations

OWENS-ILLINOIS GLASS COMPANY

GENERAL OFFICES - TOLEDO 1, OHIO

December 12, 1950

Mr. Arthur J. Vorwald, Director
The Saranac Laboratory
Saranac Lake, New York

Dear Art:

Some time ago we mentioned to you that our Kaylo Division wants to
gather together in brochure form material on the health aspects of Kaylo
tust, and wants to consider the possibility of publishing some of your
experimental findings.

As we recall it, you mentioned during the visit that Dr. Shook and
made to Saranac last July that the animal experiments were all com-
pleted (and no new ones need be started) and that the results of the
several years' program would be written up in final report form. Could
you let us know how this project stands?

Could you also let us know how we stand on the finances? Our ac-
counting department reports that they have paid two invoices this year—
one in January for \$1250 and one in May for \$1250.

We still feel that before this work can be finally completed, it
could be desirable for one of your engineers to visit our Sayreville
plant and, among other things, take some gross air samples for compo-
sition analysis. Any time such a trip can be worked into your schedule
conveniently, let us know.

One more point—you mentioned last July that all the asbestos work
carried on through the years at Saranac was being written up and would
be published. Has this been done yet?

Best wishes to you and Mrs. Vorwald for a merry Christmas—with
lots of snow in the Adirondack hills—and a happy New Year.

Sincerely yours,

B. C.
