February 25, 1977

TO: Work Practices Subcommittee - Vinylidene Chloride Monomer

Gentlemen:

Mr. W. R. Hoopes, Chairman, has called a meeting of the Work Practices Subcommittee on March 15, 1977. The meeting will be held in MCA Offices, Room 407, and will begin promptly at 9:00 a.m.

Comments have been received from members of the Technical Panel on the draft document mailed to all members on September 9, 1976. Some of these commentaries are broad in scope and others constitute essentially a complete rewrite. Apropos of the latter is the enclosed excellent draft submitted by Mr. W. V. Andresen, Director of Occupational Environmental Services of American Cyanamid Company. A copy of Mr. Andresen's letter to Mr. Hoopes is also enclosed. The Chairman requests that Subcommittee members carefully review both of these documents prior to the meeting.

The Chairman further requests that Mr. Andresen attend the March 15 meeting of the Subcommittee.

Sincerely,

J. T. Seawell
