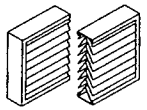
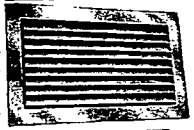
KRUEGER MANUFACTURING CO. TUCSON, ARIZONA

THERMOTANK

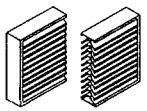
THERMATROL



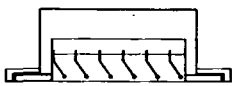
☐ The **600 Series** non-vision door grille is designed for installation in doors, walls, or partitions where constant passage of air is desired with non-vision. V shaped fins are spaced on ½ inch centers for greater free area.



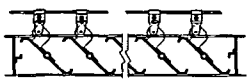
☐ The **180 Series** has a curved blade design which reduces drafts and insures even diffusion of air. Construction is steel frame with curved aluminum blades individually adjustable. Aluminum frame available. Finish is gray prime coat. Model 184 illustrated.



☐ The **AL 600 Series** non-vision door grille is designed for installation in doors, walls, or partitions where constant passage of air is desired with non-vision. V shaped fins are spaced on ½ inch centers for greater free area.

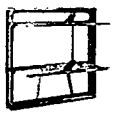


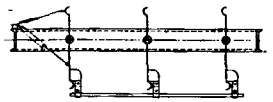
☐ **#5FF with S80H.** The #5 filter frame solves your filter location problems. Frame can be installed in ceiling or wall before or after plastering. Filter frame can be made for any filter application. Also available with hinge.



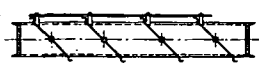
☐ The **XY Series** storm louvers can be used for fresh air intake or for exhaust air. The type of flange or frame is optional.

☐ The **XAL-1 Series** uses extruded aluminum blades creating an attractive, weather proof and weather resistant outside louver.





☐ **Fire damper** is made of heavy channel frame rigidly welded for sturdy construction. Blades are 16 guage, unless otherwise specified. All dampers are equipped with a standard 165 degree fusible link, unless otherwise specified. Meets N.B.F.U. specifications.



☐ All Design-Air **Mixing Dampers** are made of sturdy channel frame rigidly welded for a sturdy assembly. Blades are 16 gauge steel. A large variety of widths are available.

☐ **Opposed blade mixing dampers** blades move simultaneously in opposite directions to provide uniform distribution of air over the entire face of the damper. Smooth action permits positive damper setting in any position from fully open to fully closed with minimum disturbance of air pattern.

For a free illustrated brochure on the Krueger Research and Test Laboratory write, **Krueger Manufacturing Company, P.O. Box 5155, Tucson, Arizona.** Ask for Form 214 entitled "Facts for you about our ADC Certified Research and Test Laboratory." When writing for detailed information on any Krueger Product please give Series number.
