Attention: D. E. Roush--Heat Transfer Fluids

Dear Mr. Roush:

Answering your questions relative to our position on Therminol installations, let me say that our present ordinance would not require a licensed operator. At this time only equipment operating above 15 p.s.i. is required to have an attendant on duty.

We are familiar with organic fluid generators, although there are none in our jurisdiction at this time. These systems afford many benefits in my opinion, but have limited local application, as we have a good central steam generating facility of long standing.

I trust our comments will be of value in your studies.

Very truly yours,

H. H. Van de Ven
Assistant Director
