Mother's Milk Fed

time	verbatim transcript
12:00 p.m.	If you're planning to breast feed your baby, do not eat fresh water fish. They could contain the poisonous chemical PCB's. And that chemical could end up in the milk and that could be harmful to your baby. Those are the findings of two public interest groups including a Ralph Nader organization. They want the Department of Health Education and Welfare to warn all women of child-bearing age not to eat fresh water fish.

The above transcript has been edited for readability eliminating verbal hesitations. Unintelligible phrases are enclosed in parentheses. Proper names are spelled phonetically.
