HASKELL LABORATORY FOR TOXICOLOGY AND INDUSTRIAL MEDICINE

Complete this Sample Information Form for each sample submitted.

HASKELL NO. 7802*

1. CA or IUPAC nomenclature:

2. Other name (s):

Coverall Fabric

3. Structural formula:

4. Composition by % (mixtures, including carriers and substrates):

Dacron/cotton woven fabric - standard fabric used in coveralls available in retail stores

phone from G. Limpiros & C. Barros 74.05.07.

5. Department code: _____ Lot No: _____

6. Characteristics: Color _____, Form _____, Mp _____ °C _____, BP _____ °C at _____ mm Hg atm., VP at 25°C _____ VP at _____ °C _____, (attach a VP curve, if available), SpGr _____, pH _____, Vapor density (air = 1) _____, Open cup flash point _____ °C, Explosive (specify conditions) _____.

7. Solubility in: H_2O _____ g/L, Acetone _____ g/L, Ethanol _____ g/L, Vegetable oil _____ g/L, Others (specify) _____.

8. Special handling instructions _____.

9. Maximum process temperature _____ in presence/absence (delete one) of air.

10. Name, location and telephone number of person having knowledge of pertinent analytical procedures _____.

11. Submitted by G. Limpiros Department T.F.
Location Centre Rd. Telephone 3706 Date 10/23/72.

Samples will be retained six months after final report unless otherwise requested. The sender should retain a suitably identified portion of the sample.

*To be completed by Haskell Laboratory Personnel.
