Dear Sir,

After receiving letters from Dr. Barry and Mr. Batchelor I investigated the position in N.Z. with regard to the introduction and handling, in the Dominion, of petrol already blended with T.M.L..

I had a discussion with the Director of Public Hygiene, Dr. Kennedy, and he gave me the assurance that there would be no restriction of this practice from the Health Dept..

I have already cabled Mr. Batchelor with this decisinn and am arranging to have this confirmed in writing. Yesterday I had a letter from Dr. Kehoe which strengthened my attitude to keep this matter confidential.

Yours truly,

Copies to Dr. Barry, Dr. Kehoe & Mr. Batchelor.
