

FELIX EDGAR WORMSER
CONSULTING MINING ENGINEER
ROCKWODE LANE
GREENWICH, CONNECTICUT

September 28, 1966

Mr. David Borquina
Secretary
Lead Industries Association
292 Madison Ave.
New York, N.Y.

Dear Dave:

Upon my return from the west I found an invitation from the President of the Chamber of Commerce of the United States to serve on an important new advisory panel of the Chamber to be concerned with Environmental Pollution. A copy of the invitation is enclosed. Mr. M. A. Wright, the President of the Chamber is also Chairman of Humble Oil & Refining Co. of Houston.

Having served as a Director of the Chamber for six years I am familiar with the power and prestige of the Chamber. It functions through hundreds of affiliated city and state Chambers and is a respected voice in Washington. It should be of great help to us in the air pollution controversy.

I am quite willing to accept the invitation in furtherance of our interest without any fee provided the L.I.A. will defray my travel expenses..

An early word from you to assist me in acknowledging the invitation from the Chamber will be greatly appreciated.

With kindest regards,

Sincerely yours,

CHAMBER OF COMMERCE OF THE UNITED STATES

M.A. WRIGHT
PRESIDENT

Mr. Felix Wormser
Consulting Mining Engineer
Rockwood Lane
Greenwich, Connecticut

Dear Mr. Wormser:

This is to invite you to serve on an important new advisory panel that will advise a number of National Chamber committees as well as the Board of Directors of the Chamber of Commerce of the United States. This panel is called the Environmental Pollution Advisory Panel.

The panel will be composed of distinguished individuals from business, industry and the academic community. Its chairman is John M. Fulton, Corporate Representative, Crown Zellerbach Corporation, Portland, Oregon. The panel will meet several times during the next 12 months, usually in Washington, D. C.

The purpose of the panel is to analyze and evaluate past, current and future proposals for controlling man's environment, with particular attention on water, air and land pollution.

Based on the evaluation, the panel will recommend:

1. A course of action the National Chamber should take to develop optimum environmental conditions; and
2. recommend specific policy positions and programs for consideration and acceptance by appropriate committees of the Chamber and, eventually, the membership.

I know you can make a highly valuable contribution to this panel and it is my hope that you can accept this invitation to serve on it.

Yours sincerely,
