VAPOR PRESSURE AND THERMAL STABILITY APPARATUS FOR THERMINOL FLUIDS

R. L. McHugh - JFQ Research

H. L. Hubbard - J.
T. M. Patrick - JFQ Res.
L. Fowler - JFQ Res.
M. McEwen/T. P. Sands/
O. Dolin - Anniston
G. E. Buchanan
W. E. Koerner - JFQ Res.
S. Shaw
D. F. Smith

The schedule in Bill Koerner's memo of June 22 calls for active use of the new thermal stability analytical equipment at Anniston on August 31.

Our program must proceed on the latest schedule with sales of THERMINOL FR products beginning August 1. Perhaps we can use the isoteniscope, as you suggested, to cover our needs from August 1 through August 31.

I would like to meet with you Thursday morning, July 5, to arrange details for this and to finalize all other specifications on THERMINOL FR products for recommendation to Anniston - OK?
