As per our telephone conversation, please prepare 2,000 gallons of MCS 295 at the Krummrich Plant. Charge the material into 55-gallon Aroclor type drums at the rate of 635 pounds per drum and mark drums MCS 295. The composition of MCS 295 is as follows: 20% by weight tri-tetrachlorobenzene; 80% by weight Aroclor 1242.

Estimated sales for the next year is 5,000 gallons per month.

If you need any further information, please let me know.
