DOCUMENT DESCRIPTION: Letter from Bendix to W.W. Sly Manufacturing Co.

M-6

December 4, 1950

Mr. Arthur H. Bond
W. W. Sly Manufacturing Co.
246 Sagamore Drive
Rochester 12, New York

Dear Mr. Bond:

One point that I intended discussing with you during your last visit was the question of submitting plans and specifications as necessary to the State Department of Labor covering our proposed additional dust collector equipment.

For your information, I have submitted an appropriation request to Management covering the 10,000 cfm unit as described in detail in your last Proposal #B-344. I estimate that it will take approximately two weeks for this appropriation to be acted upon. In making this request, the actual labor and materials of installation, which include the sheet metal work necessary to complete the system, will have to be covered by a further appropriation on my part. My thought in handling it this way is to get the actual collector equipment, especially the fan and motor, on order at the earliest possible date. During the intervening period, while awaiting delivery we will, of course, have to plan the actual duct installation in detail and make arrangements for its procurement locally.

Again with regard to State approval, I believe that all the above planning will have to be accomplished and submitted to them. On the other hand, inasmuch as the new collector is in a sense an expansion of existing equipment, there might be something to be said for presenting the information to the State as an accomplished fact.

I shall appreciate having your thoughts on the State approval angle for this project.

Very truly yours,

MARSHALL-ECLIPSE DIVISION
Bendix Aviation Corporation

C. N. Menz
Plant Engineer
