Dear Dick:

You did an excellent job on the rewrite of the Capacitor Section of ANSI Guide C107.1. I just have some minor suggestions as follows:

page 2 line 3 - add of 0.4% or less
page 7 line 5 - add PCBs may occur
page 11 Par 6.1.1.2 - second sentence is not clear. "Where it is not possible to maintain such a number, the capacitor manufacturer should call those persons ... " In this section it deals with Monsanto notifying the capacitor manufacturer; I think the sentence should read --"the capacitor manufacturer should furnish at least three persons who may be contacted, in succession ..."

Please send me a copy of the "final" draft that will be sent to ANSI.

Best regards.

Sincerely,

J. Coleman Weber
