

# 8 PAINTERS IN EVERY 10 USE DUTCH BOY

[According to an impartial, country-wide survey]

Back of the beauty of hundreds of homes right in your community—back of the paint protection that shields the dollars and cents investment in them—is Dutch Boy White Lead. For eight painters in every ten use Dutch Boy. Use it because they know its coupled beauty with protection for a longer period of time—because it makes possible a wide variety of attractive tints and colors—because Dutch Boy never gives a home owner cause to complain about scaling and cracking and, for the same reason, it does not demand burning and scraping at repainting time. And finally, eight painters in every ten use Dutch Boy because in every sense of the word it gives a custom-made paint mixed to order for your particular job. Write for free booklet... "The House We Live In"—which gives helpful suggestions on the decoration and protection of the home. Please address the branch office nearest you.
