E. V. John - St. Louis

January 25, 1971

Mr. William B. Papageorge - WPAP.

LONDON
Mr. John Carr

CONFIDENTIAL

Thought you might be interested in a little additional background information on PCB activities in the U.S. The attached paper was prepared for the National Industrial Pollution Control Council (C. H. Sommer is a member).

NIPCC asked, last month, for write-ups on what industry is doing voluntarily to control pollution. This write-up was prepared at that time but subsequently management decided not to submit it to NIPCC for other reasons.

The write-up has never been used in print but is a good summary of what we have done to control losses of PCB. You may use it as you see fit with one exception -- under the heading Commitment, do not release the dates (i.e., April, 1971) indicated there. Striking out the dates will not substantially alter the content.

E. V. John
