BIPHENYL

ANNISTON - O. E. DOLIN

Ed has passed over to you a sample of Schenectady Chemical's biphenyl for routine analysis. This sample is supposed to contain a large amount of naphthalene. Will you please analyze it by your normal procedure against our specifications.

G. D. Searle is interested in receiving our method of analysis for naphthalene and methyl biphenyl impurities in our biphenyl. Will you please send me copies of this method if you have it.

If it is not available, by copy of this memo to Ed, I suggest that you send me the Research VPC method.

B. Y. ABADIR
