MEDICAL EXAMINATIONS - EMPLOYEES EXPOSED TO ASBESTOS FIBERS

Re.: Medical Examinations - Employees Exposed to Asbestos Fibers;
Letter H. J. Ducote to D. Landry, dated 8/23/73.

OSHA requires that all employees exposed to asbestos fibers have annual physical examinations. The subject letter showed specific items which must be included in the examination and a list of mechanics who should receive the annual examinations. Following that letter, Medical started making the specified tests. They went further by including the tests in the physical examination of all employees.

OSHA requires that the list be kept current. Since required tests shown in the subject letter are included in all employee physicals, the plant roster will be used as that list. Please notify the Engineering Department if any of these tests are dropped in the medical examination of any persons.
