APR 6 1972

Dear Mr. Ayres:

This is in reference to your letter of March 16, 1972 wherein you reminded us that we had not given you further information regarding the talc products that may fall into the classification of controlled asbestos and specifically in regard to the State of Illinois Pollution Control Regulation.

As we outlined to you in our telephone conversation back in the beginning of February, this is a very intricate area; and while it may well seem that we have taken an inordinate amount of time, this particular Illinois statute is very complex and we feel it needs more than one interpretation.

In essence, Mr. Ayres, we are working very diligently on defining what we may feel are unrealistic regulations but what we also realize are the ways of our time. We are concerned about this matter and are on top of the situation. As soon as we have definitive information, we will contact you.

Very truly yours,

WHITTAKER, CLARK & DANIELS, INC.
