THE RESINOUS PRODUCTS & CHEMICAL CO., INC.
222 WEST WASHINGTON SQ., PHILADELPHIA PLANT: BRIDESBURG, PHILADELPHIA, PA.

October 4, 1940.

Monsanto Chemical Company,
Anniston, Alabama.

Gentlemen: Attention: Mr. E. L. Sanderlin, Purchasing Agent.

In response to your query of October 1st, we would advise that the sample of Paraplex RG-2 shipped against your order #30953, is a solution 60% solids in Toluol. Further, we would advise that this material is supplied in both the 100% form and as a 60% solution as described. Unless our customers specifically request the 100% solids material, we ship it as a solution, in which form it is most generally used. In order that there be no misunderstanding in the future, we would suggest that you indicate on your orders when the 100% solids material is desired.

We have ordered out today, a

1 lb. sample of Paraplex RG-2, 100% solids,

which is the same grade of material which we have previously shipped to your St. Louis, Missouri, plant.

We regret that we misinterpreted your order and hope that you were not seriously inconvenienced by the delay.

Yours very truly,

THE RESINOUS PRODUCTS & CHEMICAL CO. INC.

N. R. Siegfried
