A Yes, that lab was doing work on Kaylo and various other types of high temperature insulation.

Q And there were no other labs throughout the entire Owens-Corning Fiberglas network that had anything to do with testing Kaylo; isn't that true?

A No. Product testing laboratories tested our product.

Q And where was that located?

A The next building up from ours.

Q All right. Now, you then went to Berlin and oversaw the actual Kaylo being made; is that correct?

A Yes.

Q And you have done, yourself, have done tests on Kaylo for its strength?

A Oh, yes.

Q For its ability to withstand stress?

A Flexural strength, compression strength, yes.

Q You have also indicated to Mr. McGowan you have done tests on Kaylo so that you can compare it to other insulation that was located in the stream of
