RESPONSE

Hon. Commissioner of Patents and Trademarks
Washington, D. C. 20231

Sir:

This is in response to the Office Action dated June 5, 1990.

The undersigned wishes to thank the Examiner for the telephone interview kindly granted herein. This response embodies subject matter discussed during the telephone interview as placing the Renewal Application in condition for allowance.

As explained to the Examiner, the Assignment of this trademark and others dated May 10, 1990 was part of a greater Assignment of many more trademark registrations made about seven or eight years ago. For some reason, the trademarks listed on the May 10, 1990 Assignment document were not included in the original Assignment of all of the trademark properties. Hence, the May 10 Assignment is dated recently but, in effect, all of the trademarks were transferred a number of years ago. This is

alluded to in the May 10 Assignment in the third paragraph of the first page where the assignment states that the Assignor "has sold, assigned, and set over" the trademarks listed on Schedule A (emphasis added). In effect, this language refers to the Assignment of seven or eight years ago which is referred to above.

Hence, it appears that the May 10 Assignment refers to an earlier Assignment predating the execution of the Renewal Application.

In view of this, it is respectfully requested that the Renewal Application be allowed and that the renewal of the trademark registration be effected.

Respectfully submitted,

In re: Registration No. 893738 for the mark
SEXAUER PRODUCTS AND DESIGN

Receipt is acknowledged of the application submitted under the provision of Section 9 of the Trademark Statute.

Renewal is withheld in view of the following:

The records of the Assignment Branch of the Patent and Trademark Office show title to the registration to be vested in J.A. Sexauer, Inc. rather than the present claimant. The present claimant must establish ownership of the registration as of a date at least as early as April 18, 1990, the date of execution of the application. Ownership may be established by: (1) recording appropriate documents in the Assignment Branch, or (2) submitting proof of the transfer of title to the present claimant. In either case, a complete chain of title must be established from the registrant of record to the present claimant.

If the present claimant chooses to establish ownership through recordation in the Assignment Branch, the claimant should notify the undersigned when the document or documents have been filed for recording. The filing of a document in the Assignment Branch does not stay the six-month period for responding to this action.

If the present claimant chooses to establish ownership by submitting proof of the transfer of title, the claimant should submit evidence of such transfer. Appropriate evidence may consist of a copy of the document transferring ownership from one party to another or an explanation, supported by an affidavit or a declaration under Trademark Rule 2.20, signed by the registrant, that a valid transfer of legal title has occurred.

If a response to a refusal of renewal is not filed within six months of the date of mailing of the action, the application for renewal will be considered to be abandoned, 37 CFR Sec. 2.184.

Mark SEXAUER PRODUCTS AND DESIGN

Applicant J. A. Sexauer Mfg. Co., Inc.

It appears from a search of the Patent Office Recrods that applicant may be the owner of Registration Nos. 375,977; 536,341; 861,261; and others. If this is the case, the application should be amended to include the following statement: "Applicant is the owner of Registration Nos. 375,977; 536,341; 861,261; and others."

The descriptive term "products" should be disclaimed apart from the mark as shown.

Applicant is advised that the term "namely" should be inserted in the identification of goods after the phrase "non-metallic faucet repair parts" and the indefinite phrase "and the like" should be deleted. "Non-metallic faucet repair parts, namely, washers, cushions, packing, gaskets, and leathers" would be an acceptable identification for Class 35.

However, tape is generally classified in Class 5, and the nature and use of the tape should be more definitely specified. Non-metallic faucet repair parts, namely, valve discs, diaphragms, rings, cups, fuller balls, plunger rings, tubing elbows and connections, seats, and candle wicking stoppers are in Class 13.

Section 30 of the Act of 1946 permits combined applications provided a fee is paid for each class in which the goods fall. Applicant may therefore elect either to restrict the application to a single class or to pay an additional filing fee for each additional Class. In the event applicant

A proper response to this Office action must be received within 6 months from the date of this action in order to avoid ABANDONMENT.

FORM POL-89 (REV. 6-66)

1 — Trademark Application File Copy

chooses the latter alternative, five new specimens for each additional class should be submitted together with an affidavit or Rule 2.20 declaration by applicant to the effect that the specimens were in use at the time of the filing of the application.

The goods should be rewritten grouped according to class in ascending numerical order and separate dates of use given for the goods in each class. If the dates are the same, the application should be amended to so state. Amendment to the dates of use must be supported by an affidavit or Rule 2.20 declaration by applicant to the effect that the mark was first used on the goods on the dates specified in the amendment.

A search of the Office records fails to show that the mark, when applied to applicant's goods is confusingly similar to any registered mark.
