October 5, 1972

Monthly Summary
September, 1972

R. W. Bucknell

Santicizer 334F

Sales 3,430 Budget 42,000

Several drums of Santicizer 334F were distilled to produce Santicizer 334F Special. The distilled product has improved aqueous resistance and was developed particularly for the medical products industry. Tests are underway at W. R. Grace (Ellay Rubber), Baxter-Travenol and Abbott. General Tire re-ordered S-334F for use in food conveyor belts. A 55-gallon drum was also purchased by Scandura Company for medical equipment use.

Plasticizers and The Environment

Paul Graham (as MCA Committee Chairman) presented a paper at the National Institute of Environmental Health Sciences Meeting on Phthalates. The presentation dealt with plasticizer theory and plasticizer technology as it relates to environmental considerations. Other MCA data on plasticizer toxicology were also presented. The meeting turned out to be relatively low key, scientifically oriented and balanced in perspective. Subsequent press releases substantiated this observation.

Ninety-Day subacute feeding studies on Santicizer 711 showed no untoward effects at dietary levels of 1000 and 3000 ppm. Biological effects were noted at 10,000 ppm (1% of diet). The latter level is high and would not be expected to occur during use.

The report to the overall MCA membership by the Ad Hoc Committee has been sent out for approval. Commencement of work outlined in this report will start in November - provided it is approved.

Santicizer 79TM

	<u>Sales</u>	<u>Budget</u>
Santicizer 79TM	75,560	182,000
S-360 (S-79TM/DUP)	<u>49,740</u>	
	125,300	

September was a good month for Santicizer 79TM. Carol Cable ordered 41,000 pounds for THHN and THWN insulation. General Cable reordered Santicizer 360 (S-79TM/DUP). A processing problem with Santicizer 321 (S-79TM/DUP/ESO) was reported from Waterbury. The cause of the difficulty in dry-blending is undetermined as of now. Previous shipments of S-321 to Waterbury presented no problem.

Santoset I

<u>Sales</u>	<u>Budget</u>
5,400	6,000

Volkswagen (Mexico) is now using Santoset I. The projected volume is reported to be 60-75 M lbs./year. If this volume is correct, it will almost double our sales of Santoset I.
