SUBJECT: SMITH & KANZLER
PURCHASE SPECIFICATIONS

re: Tentative P. S. #564
Letter H. North to
V. Labrecque & L. Dymitro
dated May 16, 1968

The above correspondence refers to Tentative Purchase Specification #564 dated March 1, 1968. The above specification covers changes in roll weights and includes requirement for certification. Mr. Johnson at that time objected to the certification requirement and the dispute was referred to the Materials Development Laboratory and Smith & Kanzler and Quality Control for resolution.

As a result of discussions between Mr. Dymitro, Mr. Johnson, and the writer, we wrote to Mr. Johnson on June 24, 1968, defining the certification of compliance requirement as outlined in Tentative Purchase Specification #564.

Since this correspondence was sent, there has been no further action regarding acceptance of this Purchase Specification. We ask your assistance in getting this matter resolved so that an up-to-date Purchase Specification covering this material can be finalized. Thank you for your assistance.
