Bay City Plant Regulatory Agency Visit

AGENCY: Texas Air Control Board, Houston, Texas

NAME OF AGENT: Ms. Jenny Yang

BCP PERSONNEL INVOLVED: C. J. Schaefer and I. O. Coleman, Jr.

PURPOSE OF VISIT: To observe operations, if any scheduled, which involved removing of asbestos containing insulation.

DATE: March 7, 1979

TIME: 10:50 a.m.

COMMENTS:

No operation involving removing of insulation was in progress at the time of Ms. Yang's visit. I explained the situation to her again about not being able to guarantee that insulation removing operations would be in progress at the time of her visit. She said that she understood and had no problems with the situation. She explained that she had to be in the area on today anyway to visit several other sites (Rice Dryers and Texas Gulf Sulphur).

I reviewed our asbestos handling procedures with her. She appeared to be satisfied and commented that the procedures were easily readable and should present no environmental problem if followed as read. She did ask for a copy of the procedures and I told her that I would transmit a copy through legal counsel to her (will copy her on letter that has to be submitted to TACB Austin Office outlining our procedures).

She stated that EPA had given TACB a directive to get out and make visual observations of renovation and domolition operations which involved removing of asbestos containing materials. Therefore Ms. Yang is still very much interested in observing the removing of asbestos containing insulation relative to our 1979 planned renovation operations (reported to TACB) via required letter of notification. She asked if it were possible for us to notify her by telephone if we became aware of a time (as few as 24 hours or less) when insulation would be scheduled to be removed. I told her that I would get with those persons assigned to the reported projects, ask them to advise me as early as possible when the work schedule would include removing of insulation and telephone her to let her know as she requested.

Ms. Yang thanked us for our cooperation and said she would be looking to hear from us.

I. O. Coleman, Jr.
