October 25, 1971

Mr. Thomas D. Sinclair
Communications Manager
Plastics Department
The Dow Chemical Company
Midland, Michigan 48640

Dear Tom:

Today I talked to Mr. W. B. Papageorge, our manager of environmental protection, and one of the men who called on James Heck last week. Mr. Papageorge and the group had a very informative meeting with Mr. Heck, and their feeling was that it would not be necessary to write a letter directly to Representative James F. Smith regarding the PCB/PVC issue.

Mr. Heck appreciated the personal call and the opportunity to discuss the subject. The group felt that he would relay the information to Representative Smith. Hopefully, the PCB issue has been successfully separated from the PVC subject, and it should not be a cause of further confusion at the hearing on October 26.

Sincerely,

Edward V. John
Director of Public Relations
Monsanto Industrial Chemicals Co.
