River Forest, IL 60305

Dear Dan:

Enclosed is a copy of the age-sex-race frequencies for hourly Krummrich employees who never worked in departments 224 (chlorinated benzene), 226, 236, 237 (chlorophenols), 239 (Santophen), 246 (PCB), 262 (2,4-dichlorophenoxyacetic acid) or 268 (2,4,5-T esters) and who were never maintenance workers. As requested, I will determine the departments in which the "internal" controls worked and will send this information to you as soon as possible.

Please let me know if you need any additional information.

Sincerely,

Terry L. Leet

Terry L. Leet
