K. M. L.

January 7, 1948

Kenneth M. Lynch, M.D., Dean
Medical College of the
State of South Carolina
Charleston 16, S. C.

Dear Doctor Lynch:

In an effort to furnish Johns-Manville with a report on the experimental work on asbestosis which they have sponsored at this Laboratory, Doctor Vorwald is reviewing all available material in our files. It would be helpful if he could have at hand the vast amount of material which I forwarded to you on February 26, 1947, if it is convenient for you to send it to us at this time.

Doctor Lanza has forwarded to us Part I of Doctor Gardner's monograph on asbestosis, which you sent to him in July, 1947, together with the draft of a paper by Dr. Gardner and Mr. Cummings.

Sincerely yours,

(Mrs.) Lillian R. Blinn
Executive Secretary to -
Arthur J. Vorwald, M.D.
Director of Research
The Edward L. Trudeau Foundation
