MCS 1489 (Sulfone-Aroclor 1016 Blend)

Advantages:

- Shows good life test results in paper capacitors here and at outside labs
- Permits reducing paper and foil by 11%
- Permits 6% material cost saving in 30 μF motor start-run capacitors
- Should be an important factor in conserving scarce paper and foil

Disadvantages:

- 90% PCB

Assessment:

This product is designed to produce the lowest possible cost impregnated paper capacitors with same excellent performance that Aroclor 1016 has.
