Eden Avenue
Cincinnati 19, Ohio

Dear Bob:

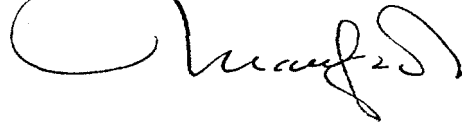

What is your opinion on this one?

In the May issue of the Farm Journal appears the following:

"Crank-case oil from engines that have been run on ethyl gasoline has lead in it. If it's used in a "hog oiler" or in mange and mite sprays, it can kill hogs. They absorb the lead through their skin."

This is apparently on the authority of Dr. J. W. Bailey, Veterinarian, of Fort Atkinson, Wisconsin.

Sincerely yours,

mb/sd
