Englewood, New Jersey

Dear Frank:

Here is the repeat analysis of the Von's Bakery-El Monte, California THERMINOL FR-2 sample:

PROPERTY	SAMPLE
Acid Number	0.01 MgKOH/gm
Viscosity @ 100°F.	70.6 centipoises
Moisture	110 ppm

The fluid is satisfactory for continued serviee. The moistur e level is slightly high. However, unless this is chronic, it is no cause for concern.

If this facility is operating smoothly now we can look at another sample in eight or ten months.

Cordially,

S. Shaw
Market Specialist
Functional Fluids
