Subject

I have decided to get things together for some GLPC work using the programmed heated column and would appreciate an approximate cost on the motor driven variac that you had L. Fowler's group build for you. Lou told me during my visit that he would be glad to make one up for me if I should so desire. I'd like to get it made on this year's budget if possible--so if you could give me a quick estimate I'll send an order to Lou right away.

It was certainly a pleasure visiting your laboratory, talking to your fellows, and seeing what all you have in progress.

Best personal regards.

Dick
