Do we need to do anything to respond to the EO 3349 which implements EO on "Promoting Energy Independence and Economic Growth" which includes verbiage about identifying any actions that may be a burden on energy development.

The Air MOU requires collaboration with the other FLM & EPA for oil & gas development projects. (b) (5)

From the "Presidential Executive Order on Promoting Energy Independence and Economic Growth"

(b) For purposes of this order, "burden" means to unnecessarily obstruct, delay, curtail, or otherwise impose significant costs on the siting, permitting, production, utilization, transmission, or delivery of energy resources.
