St. Louis, MO 63167.

Dear Terry,

I enjoyed meeting you on Thursday and have prepared the statements for Dr. McCarville as requested and trust that these are in order. Perhaps you would pass them on for me.

During our discussion, we mentioned the difficulty of identifying the foremen involved with specific operations and also the actual duties at each time period. I don't remember making any reference to the minutes of union / management meetings as a source of information. There is quite a lot of such information in these minutes especially when "Article 10" is involved. Similarly the copies of past Working Agreements have a great deal of information on job titles. You have probably taken this into consideration but I thought it worth mentioning.

Yours truly,

Clarence
