
Almost Finished

A FEW more strokes of the brush and your old car will look like new. You regret that you did not paint it months ago when it first began to look shabby.

Automobile owners and painters use BASS-HUETER *Auto Enamel* because it is easy to apply, and dries quickly with a rich, permanent finish. One coat of any of the many attractive colors will paint the average car. There are also special BASS-HUETER Products for finishing the top, seats and other parts of the car. Full instructions are on every can.
