Monsanto Chemical Company
St. Louis, Mo.

cc: Mr. O'Neal-Anniston

DATE April 18, 1941

REFERENCE

TO NEW YORK

ATTENTION Mr. Gerber

SUBJECT ROBERTSHAW THERMOSTAT CO.
Youngwood, Pennsylvania

ANNISTON

You will no doubt receive in the near future sample of Aroclor #1248 sent to you direct by the subject company.

Upon its arrival, please check it to determine if the material is fully up to our specifications for this Aroclor and let us have your comments in regard to color. The material represents Lot 3 which was shipped to this customer from Monsanto, Illinois April 7. Customer complains that the color is darker than that of previous lots and is hesitant to use the material in view of the darker color. As you may know, these people use Aroclor #1248 as an expansion medium in thermostats.

Will appreciate your teletyping your results of investigation on the sample as Robertshaw will not use the material without having our assurance that it is satisfactory and fully up to our specifications for this product.

We are having the sample sent to you in view of the fact that we can not tell how long it will be before we will be able to get information of any kind from Plant B in view of the labor situation.
