

ENER/1470 - Honeywell - PFAS restriction proposal

Meeting date and place

Meeting held on 21/02/2024 14:00

Participating organisation(s) representative(s)

	Honeywell Europe NV	Participant
	Honeywell Europe NV	Participant
	Honeywell Europe NV	Participant
	Honeywell Europe NV	Participant

Main issues discussed

- Honeywell gave a presentation on the use of PFAS/F-gases arguing that F-gases do not cause an unacceptable risk to environment and human health.
- The presentation was not looking specifically into energy-relevant uses and/or conclusions regarding the availability of alternatives. The slides have not been subsequently shared.
- DG GROW indicated that the risks caused by F-gases will be assessed by ECHA's Risk Assessment Committee as part of the PFAS restriction dossier submitted by 5 European countries. The Socio-Economic Analysis Committee will assess the availability of alternatives and the economic impacts of a potential restriction.
- DG ENER indicated that the Commission take note of the information provided. The Commission will need to take everything into account from a society perspective, including the concern related to the PFAS pollution.
