BUILDING MATERIALS DIVISION

1-7 BENT STREET

SYDNEY, N.S.W.

30th December 1948.

Messrs. Johns-Manville Corporation
22 East 40th Street
New York 16, N. Y.

Dear Sirs,

Attention Mr. H. O. Ashe

Further to our letter of 15th instant, we have now been advised by our Perth Office that 50 short tons of No. 3 Grade Blue Asbestos Fibre and 20 tons of Ore were shipped on 24th instant on the "Silver Light". This is consigned direct to you at New York and our Perth Office has advised you accordingly. The 20 tons of Ore consist of 10 tons collected after having been through two jaw-crushers and 10 tons collected after having been through two jawcrushers and one set of rolls. Markings are "Ex Jawcrushers" and "Ex Rolls", respectively.

We have booked space for a further 25 short tons of Grade 3 Fibre per the "John Bakke" due to sail from Fremantle on approximately 7th January. This shipment, however, is dependent on the arrival of the Fibre from the mine and therefore we have also applied for space for this 25 tons and a further 25 tons on the "Silver Moon" due to leave Fremantle late February. The total fibre shipped against your order will then be 100 tons.

Please advise us if this arrangement is in any way not satisfactory to you. We have been advised by the Matson Steamship Co., that they anticipate their first sailing from Australia will not be until the second week in March.

Yours faithfully

pro General Manager
