Dallas, Texas 75270

Attention: Director of Enforcement Division

Dear Sir:

We need to replace a leaking steam line in our DiAcetone Alcohol Unit. This unit is now down, and we would like to make these repairs prior to the startup. In order to do so, we must remove two feet of friable asbestos insulation from the 1" diameter line, and tie in a second steam line. The line will then be insulated with a non-asbestos type of insulation.

The attached sheet shows the information required by 40 CFR 61.22 (d).

Please notify me if you have any questions or comments concerning this notification.

Very truly yours,

P. E. Hime
Plant Manager
