1986 IMPORT CAR COLOR BOOK

Import Car Color Books are now available from Martin-Senour. These books list all the appropriate refinishing colors for import cars. The quality you have come to

expect from Martin-Senour is once again evident in these car color books.

An appropriate number of books will be sent to each jobber based on the previous year's needs and requests. Additional color books are available for \$1.45 per copy, and can be ordered through your Distribution Center.

Martin-Senour is a leader in the automotive paint and refinishing industry. For further information regarding Martin-Senour's Import Car Color Book, contact your D.C. Sales Manager.

belts/hose

NAPA BELTS/HOSE OFFERS SPACE-SAVING BELTS & HOSE DISPLAY RACK

NAPA Belts/Hose has available a new Show 'n Sell Rack that is capable of handling approximately 960 units of belts and hose in about 1/5 the space that conventional racks require.

The Show 'n Sell Rack can turn dead stock into "live stock" by bringing the store's entire inventory of belts and hose together in one convenient location — up front where customers can see them. This will also give your store a neater and more modern appearance.

Racks can be customized to fit any store's requirements and can be ordered in either 2-foot or 8-foot sections. For belts, each 2-foot section accommodates five crossbars with four hooks/bars (five on smaller belts), yielding an average of 60 belts for every 2-foot section.

For hose, each section has four crossbars with five hooks/bar (six or seven on smaller hose), allowing each 2-foot section to handle about 20 units. Crossbars and hooks are adjustable for specific mounting needs.

The Show 'n Sell easily mounts to almost any wall, eliminating the need for additional gondolas and/or pegboard.

For more information on the Show 'n Sell double-tiered display racks for belts and hose, contact your D.C. or NAPA Belts/Hose representative.

Chassis parts

NAPA CHASSIS PARTS INTRODUCES "VARI-LOAD" COIL SPRINGS

NAPA-brand "Vari-Load" progressively wound Coil Springs are now available from NAPA Chassis Parts and cover all types of popular domestic cars and light trucks, as well as commercial and off-road vehicles.

The progressively wound springs allow space between the windings to enlarge from top to bottom, enabling the vehicle to maintain adequate ride height with light or

heavy loads. Each suspension step is designed to control a proportional share of weight and maintain vehicle balance.

"Vari-Load" Coil Springs were originally designed to compensate for rear wheel drive vehicles that sag under added weight. That same technology has been applied to front wheel drive vehicles which experience similar ride height imbalances.

To complement the expansion of "Vari-Load" Coil Springs, NAPA Chassis Parts also has a complete training program to help service technicians or mechanics maximize their service potential.

For further information regarding the new "Vari-Load" Coil Springs or the NAPA Chassis School Training Program contact your D.C. Sales Manager or your NAPA Chassis Parts/Parts Craft representative.

WEATHERHEAD INTRODUCES A NEW GENERATION OF HOSE

After years of exhaustive testing and evaluations, Weatherhead introduces the Agmaster 3000, a quality Coll-O-Crimp hose combining the best of rubber and elastomeric technology. Named for its performance, the Agmaster 3000 exceeds SAE100R1 requirements by maintaining a constant 3000 psi working pressure in three popular sizes.

The Agmaster 3000 features an operating temperature of -65° to +250°F, which is higher than most competitive hoses. Highly flexible, it has a greater abrasion resistance than rubber covered hose. In fact, testing has shown that the Agmaster's braided polyester cover packs three times the abrasion resistance of standard rubber covers.

Weatherhead's new Agmaster 3000 is a natural for agricultural, hot water pressure washer and construction applications that necessitate performances exceeding SAE100R1 requirements.

Contact your D.C. Sales Manager or NAPA Chassis Parts representative for further information on the Agmaster 3000 Coll-O-Crimp Hose.

Filters

NAPA FILTERS INCREASES COVERAGE

NAPA Filters is proud to announce the addition of a number of new parts to the NAPA Filters line. All of the new parts are available immediately, making filter coverage even better than before.

The new parts include air filters for heavy duty fleet, farm and construction applications as well as import numbers fitting Honda Civic/CRX Accord/Prelude and Isuzu and Datsun trucks. Also included are three new fuel parts, a lube filter for the farm market and a Peco specialty filter.

A new size has been added to the popular NAPA Kool cooling system treatment line. Added to the pint, 5-gallon and 55-gallon drum sizes is a 1/2 gallon size (Part No. 4058). You will now have NAPA Kool for every need.

These new NAPA parts were added to keep your filter coverage as up-to-date as possible. For further information on these new NAPA Filters parts contact your NAPA Filters representative or D.C. Sales Manager.
