Que Asb. Mining Health Program

Mr. Frank Zimmerman, Director of Safety
National Gypsum Company
Buffalo, New York

Dear Mr. Zimmerman:

A group of industries are interested in promoting health safety practices in relation to toxic or potentially toxic materials.

The industries currently involved include:

Certain-teed
General Analine and Film (Ruberoid Co.)
Flintkote
Owens-Corning
Johns-Manville.

Our President, C. B. Burnett, discussed this with your Vice President, A. H. Fay. Mr. Fay has advised that you have been appointed to represent your company, and suggested that I contact you directly.

We are tentatively arranging a meeting for April 3, 1968 at 9:30 A.M. The meeting will be held in the Johns-Manville Second Floor Conference Room at 22 East 40th St.(corner of 40th and Madison), New York City.

We are currently preparing a booklet entitled "Recommended Health Safety Practices for Handling and Applying Asbestos-Cement Products".

I am confident that you will contribute a great deal to our efforts and look forward to meeting you. In the event that the date of April 3 is not convenient for you, or anyone of us has a last minute change in his travel schedules, I suggest we contact each other by phone. My phone number is Area Code 201, 722-9000 Ext. 626.

Very truly yours,

C L Sheckler
