Re: Bulk samples from Jim Strohbeck.

Dear Bill:

The bulk samples received April 6, 1987, have been analyzed for asbestos content by Polarized Light Microscope (PLM) and Dispersion Staining (DS). The results of our analysis are contained below:

LABORATORY NUMBER	SAMPLE I.D./ LOCATION	RESULTS	PERCENT ASBESTOS
B-872415	#1 Relief from V-2941 & V-2936 to Flare Header. Sample from Flare Line Tie-in DWG A-310-72	Amosite	>75%
B-872416	#2 6" Line-HP-HT Separator vapors to Exchanger T-3966 DWG No. 310-39	Amosite	>75%
B-872417	#3 Sample taken from Flare Header Line @ Blinding Point @ N plot edge of CFHT	Amosite	>75%
