Dear Ms. Lee:

As requested in our telephone conversation of September 2, I am enclosing Xerox copies of what we believe to be the original invoices for the rats ordered for IBT study no. B7298. There is no study number written on the invoices, however, the information present corresponds with the proper department number (622), approximate order date, number of animals and proper weight range for B7298. Also, no other invoices correspond to the number of animals, etc. necessary for B7298.

If I can be of further help, please contact me.

Sincerely,

Marilyn A. Biederer
