INTERDEPARTMENTAL COMMUNICATION

DATE: May 25, 1970

TO: Mr. E. L. Hay

LOCATION: Fort Dodge

FROM: T. W. Richards

LOCATION: Portland

SUBJECT: One-Day Joint Cement

Please accept this letter as authorization to dump the 114 bags of old one-day joint cement on inventory. You should not restock any Johns-Manville joint cement materials. The Fort Dodge plant is not a manufacturing facility for joint cement any longer. Therefore, it is not necessary to have joint cement available for J-M. I would appreciate your current inventories of all J-M materials and your thinking in regard to movement and profits on these materials.

T. W. R.
