ENDURANCE MILDEW & FUME RESISTANT HOUSE PAINT

A deluxe Super White House Paint — ideal for the finest homes. Excellent for exterior wood, masonry and metal in any climate. A Non-Staining Self-Cleaning House Paint that stays white and bright for years. Especially suited for homes located in industrial areas where the paint must be resistant to chemical fumes, salt spray, salt air, heavy smog and smoke. Its formulation without lead pigment makes it ideal for farm buildings and fences. Combats mold, mildew and the roughest year-round weather.

DIRECTIONS

Remove mildew, if present.

Remove all traces of mildew from surface with a sal soda solution or tri-sodium solution (1/2 lb. to 1 gallon of water). Rinse thoroughly with clean water. Allow to dry, then paint immediately.

OLD PAINTED SURFACES: Remove all loose paint, scale, blisters and dirt. Make sure surface is dry. Spot-coat bare places with Glidden Exterior Base Coat No. 1851. If the surface is porous or weathered, apply a coat of Glidden Exterior Base Coat No. 1851 over the entire surface.

First Coat: Add one pint of turpentine to a gallon of paint.

Second Coat: Apply full body. If necessary, reduce with turpentine up to one pint to the gallon.

NEW UNPAINTED SURFACES: Prime Coat: Seal knots and sappy places with shellac. Use No. 1851 Exterior Base Coat for priming. Allow 48 hours to dry under good drying conditions and longer in cool and damp weather before recoating.

Finish Coat: Apply second coat full body. If third coat is desired, add one pint turpentine to the gallon on second coat, and apply third coat full body.

COVERAGE: Up to 550 square feet per gallon over primed surface. L.C. 06316
