SUBJECT : PCB NEWSLETTER

REFERENCE

cc: T.L. Gossage - St. Louis
D. S. Pogue - St. Louis

TO : N. T. Johnson
St. Louis

Norm,

While calling at Ciba-Geigy with Don Pogue the other day, Dominguez referred to a PCB Newsletter which neither Don or I had ever heard of.

This is apparently a regularly published abstract of chemical and medical tests on the effect of PCB in the environment - on fish, animals, etc. This appears to be published by Industrial Medicine and quite probably we are well aware of it in St. Louis.

Dominguez was kind enough to give us the copies which are attached to this memo. This repeated reference to Monsanto's Aroclor surely makes ones wince.

P. L. Slayton
