Mr. Jack J. Garrett
Monsanto Company
800 North Lindbergh Boulevard
St. Louis, Missouri 63166

Dear Jack:

I must say it certainly was a pleasure finally meeting you after all the sparring we've done through the mail and over the phone. It's almost like meeting a long lost friend. You mentioned in Duluth that you might be able to provide us with some additional contacts with individuals who also might be interested in our program. We of course would be very interested in receiving such information and, needless to say, very appreciative.

In addition I would like to request some samples of Aerochlors 1242, 1248, 1254 and 1260 in order that I might conduct some acute toxicity investigations of my own with these chemicals. I might even let you see the data, assuming I have the opportunity to "bump into you" again somewhere. Seriously, any data we generate would certainly be available to Monsanto.

Until we meet again somewhere,

Very truly yours,

Kenneth J. Macek, Ph. D.
Director of Research
