RE: Asbestos Waste Disposal from the Canton Ford Plant

Dear Mr. Tatton:

Thank you for giving us the recent opportunity to serve Clark Industrial Insulating as the disposal site of asbestos waste. At your request today, I am enclosing 4 copies of the invoices from the Ford, Canton Plant asbestos disposal job.

During the course of this job, 353 drums of asbestos were disposed of at this site from the Canton Ford Plant. These were disposed of in an isolated area and records kept of the disposal site as outlined in our E.P.A. permit for the proper disposal of asbestos.

I hope this information is satisfactory. If I may be of any assistance concerning this or any other matter, please call me at your convenience.

Very truly yours,

Jerry Breitenstine
