Doctor, I apologize.

I object to this testimony as being beyond the scope of what the doctor was offered to testify in the Grewe case, which is the pleural case and now we seem to be getting into the Vandergucht case and cases which the doctor has never been offered to testify.

THE COURT: Overruled.

BY MR. IGNATOWSKI:

Q You can continue.

A Just what we have found is that the concentration of the lung or the concentration of this abdominal fat tissue is directly proportional to the concentration of asbestos in the lung.

The more asbestos you have in the lung tissue, the more you will have down here.

We also are now doing studies, Dr. Dodson and myself, in which we are looking at the concentration of asbestos in the lung tissue, in the visceral pleural, the parietal pleural, in the lymph nodes and in the cancer tissue themselves, and are comparing the different concentrations of asbestos in
