Dear Bill:

Remember how that Santosafe W/G bulletin went through with nary a change? Things are starting to average out with this Therminol Leak/Disposal piece. Changes like you wouldn't believe.

First, the "Leak-Free" side. The changes here are on the diagram. They're penciled in and self-explanatory.

Most of the changes are on the "How To Dispose" side. We planned to re-set this side with larger type, anyway, so I suppose the drastic re-writing isn't that critical.

Since things are so altered, Bill, I suppose another proof is necessary. Please call if you have any questions.

Cordially,

Charles L. Curtis
Sales Promotion Manager
