Bob, where do we stand on drums silk-screened with multi-language PCB warning labels for our dielectric fluids (Aroclor/Pyranol/Inerteen). Also the wording on the labels. Howard Bergen wants to have this in effect by the end of November.

We also need to consider labels for Therminol. This would be a simple "food contact" warning along the lines of the statement in our Therminol bulletins.

Finally we should consider putting a similar food warning label on some if not all of our Pydrauls.

Please let me know when you can discuss this.
